[DOI: [10.1063/1.3098532](https://doi.org/10.1063/1.3098532)]

We are pleased to announce the implementation of a new multimedia capability for the authors and readers of *Physics of Plasmas*. Multimedia files for video clips or animated movies can be included in the online version of the paper. These multimedia files can be viewed by simply clicking on a link in the paper, provided the reader has a video player, such as Windows Media Player™, QuickTime Player™, or RealOne Player™ installed.

Detailed information for authors who wish to incorporate multimedia materials into their papers is available in the

“Information for Contributors” posted on the journal’s website at <http://pop.aip.org/pop/submit.jsp>. The files must be submitted with the paper and will be available to referees. The multimedia files will appear in the hard copy (i.e., printed version) as a still image or sequence of still images from the video.

We believe that this is an important step forward, which will be very useful to our readers. We hope that authors with appropriate and important information that is best conveyed in a video format will utilize this new capability.
