

Free Online Color for *The Journal of Vacuum Science and Technology A*

Beginning with accepted manuscripts received at AIP's production office after 6 April 2004, illustrations will appear in color in the **online journal** free of charge to authors. To take advantage of this free service, authors must supply usable color graphics files in time for utilization during the production process. Previously, the use of color in *JVSTA* Online was paired with use of color in the printed journal and required author payment.

A usable color graphics file must be in one of the following formats: Encapsulated PostScript (.eps), PostScript (.ps), and Tagged Image File Format (.tif). No other type of color illustration is acceptable, and only one version of each graphics file will be accepted. In addition, the color file must arrive at AIP in time for use during the production process. If a color graphics file is received after the production process has been completed, it will not be used, and the illustration will appear in black & white online. For submission instructions, refer to Information for Contributors.

In order to maintain online color as a free service to authors, the journal **cannot** accept multiple versions of the same graphics file. Authors may **not** submit two versions of the same illustration (e.g., one for color and one for black & white). When preparing illustrations that will appear in color in the online journal and in black & white in the printed journal, authors must ensure that: (i) colors chosen will reproduce well when printed in black & white and (ii) descriptions of figures in text and captions will be sufficiently clear for both print and online versions. This is the author's responsibility.

If usable color graphics files are received in time for the production process, authors will see color versions of those illustrations when viewing their author proofs. (The Corresponding Author will receive notification from AIP when the proof, as a PDF file, is available for downloading.) At the proof stage, authors must insert the phrase, "(Color online)," into the captions of figures that will appear in color in the online journal and in black & white in the printed journal. This is the author's responsibility. An example of an amended figure caption appears below:

FIG. 10. (Color online). Experimental (dotted curve) and simulated (solid curve) x-ray diffraction spectra.

The procedures for obtaining color in the printed journal remain unchanged. Authors or their institutions must bear the cost of any color they wish to use in the **printed** version of their papers. A fixed rate of \$650 for the first color figure and \$325 for each additional color figure will apply. For multipart figures, a single charge will apply only if all figure parts are submitted as a single piece of artwork.

The Editors and the American Institute of Physics hope that availability of free online color for *JVSTA* will be beneficial to the journal community. Please direct questions about free online color to the Production Office at jva@aip.org.
