

The background of the cover is a dark grid pattern. Scattered across it are several 3D wireframe models of mathematical surfaces. These include a large, complex surface on the left with a jagged, fractal-like edge; a large, smooth, curved surface in the top right; and several smaller, more compact surfaces, some resembling spheres with small protrusions or indentations, located in the top center and bottom right.

Journal of MATHEMATICAL PHYSICS

*Bringing you fundamental
mathematical developments
with applications
to physical systems*
