

Journal of
MATHEMATICAL PHYSICS

Morton Hamermesh, Editor

Editorial Board

Term ending 31 December 1978

M.J. Ablowitz
 Kenneth Case
 Feza Gürsey
 K.T. Hecht
 David Ruelle
 K.G. Wilson

Term ending 31 December 1979

Joseph L. Birman
 Cecile DeWitt-Morette
 Hermann Flaschka
 Victor Twersky
 Jefferey Winicour
 Daniel Zwanziger

Term ending 31 December 1980

Fritz Coester
 Peter G.O. Freund
 Jerome K. Percus
 Paul Roman
 Rainer K. Sachs
 Hugo D. Wahlquist

AIP EDITORIAL STAFF: William Payne, *Chief Copy Editor*; Jean Chee, *Senior Copy Editor*.

The *Journal of Mathematical Physics* is published monthly by the American Institute of Physics (AIP). Its purpose is to form a medium of publication of highly mathematical physics articles and papers on branches of mathematics that are currently or potentially useful for the development of theoretical physics. Mathematical manuscripts should be written in a manner that is understandable to theoretical physicists. Although most papers appearing in this journal are original, occasionally reviews of mathematical topics of interest to physicists will be published.

Information for Contributors

Submit manuscripts to Morton Hamermesh, Editor, *Journal of Mathematical Physics*, Physics Department, University of Minnesota, Minneapolis, Minn. 55455. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whoever holds the copyright) to AIP; a form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new (1978) U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a page charge of \$70 per page (with a one-page minimum) and an article charge of \$20 per article. The page charge (if honored) entitles the author to 100 free reprints. For Errata the minimum page charge is \$10, with no article charge and no free reprints. Non-payment of the publication charge may lead to delays in publication.

Manuscripts should be typewritten in black ink on durable white paper, and on one side only. They should be double-spaced (including abstracts and references) with wide margins, and an original submitted to the Editor. Authors should retain a copy of their manuscript and whenever possible submit a copy with the original. The *Style Manual* (\$7.50 prepaid) of AIP will be most helpful in the preparation of manuscripts.

References should appear as consecutively numbered footnotes. Literature citations of technical journals should be in the form indicated in the *Style Manual* of AIP.

Tables must be typewritten on sheets separate from the running text. Each table must have a caption that will make the

data in the table intelligible without reference to the text. Avoid complicated column headings.

Equations should be neatly typed or written in ink, punctuated and aligned to bring out their structure and numbered on the right. To indicate continuity of mathematical expressions use x rather than a centered dot, except for scalar products of vectors. Use "exp" for complicated exponents.

Notation must be legible, clear, compact, and consistent with standard usage. All unusual or handwritten symbols whose identity may not be obvious must be identified in the margin the first time they appear, and at all subsequent times when confusion might arise.

Figures should, whenever practicable, be planned for reproduction in one-column width (8.5 cm). Line drawings should be India ink on white paper or tracing cloth. The original drawing or a high-quality glossy print should be submitted. Lettering, preferably drawn with a mechanical set, should be of a size so that when reduced the smallest lower-case letters will not be less than about 1.5 mm. Avoid gross disparities in lettering size on a drawing.

AIP's Physics Auxiliary Publication Service (PAPS) is a low-cost depository for material which is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor.

Proof and all correspondence concerning papers in the process of publication should be addressed to: Editorial Supervisor, *Journal of Mathematical Physics*, American Institute of Physics, 335 East 45th Street, New York, N.Y. 10017. In all correspondence reference should be made to title, author, journal, and scheduled date of issue. A limited number of **alterations in proof** are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1978, American Institute of Physics. Individual readers of this journal, and nonprofit libraries acting for them, are freely permitted to make fair use of the material in it, such as to copy an article for use in teaching or research. (For other kinds of copying see "Copying Fees.") Permission is granted to quote from this journal in scientific works with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires, in addition, the consent of one of the original authors and notification of AIP. Republication or systematic or multiple reproduction of any material in this journal (including abstracts) is permitted only under license from AIP; in addition, AIP may require that permission also be obtained from one of the authors. Address inquiries and notices to Director, Publications Division, AIP.

539	On the stationary Einstein–Maxwell equations	C. Hoenselaers
542	Evaluation of simple Feynman graphs	Bernie G. Nickel
549	The geometry of the gravitational field at spacelike infinity	Paul Sommers
555	On the Palatini method of variation	Michael Tsamparlis
558	Global thermodynamical stability and correlation inequalities	M. Fannes, A. Verbeure
561	Tachyonic scalar waves in the Schwarzschild space–time	S.V. Dhurandhar
568	Slavnov–t Hooft identities in Mandelstam’s formalism	Seichi Naito
574	On independent sets of basis functions for irreducible representations of finite groups	Vojtěch Kopský
577	Scattering theory for Stark Hamiltonians involving long-range potentials	J. Zorbas
581	Matrix element expansion of a spin wavefunction	George B. Smith
586	The interaction of the gravitational and electromagnetic fields	David Lovelock
593	Multidimensional wave radiation from a source with Gaussian time variation and Gaussian-approximated distribution about a spherical sheet	Lim Chee-Seng
608	Invariant properties of n -point functions and n -point functionals connected with the translational invariance of the formal measure	Jerzy Hańćkowiak
613	A geometric theory of charge and mass	Richard Shurtleff
619	Large time behavior of the superfluorescent decay	V. Benza, E. Montaldi
624	Homogeneous and isotropic world models in the Yang–Mills dynamics of gravity. The structure of the adiabats	M. Camenzind
635	Integral representations of particular integrals of a class of inhomogeneous linear ordinary differential equations	George L. Johnston
642	Quantization of spinor fields	Piotr Garbaczewski
653	The local von Neumann algebras for the massless scalar free field and the free electromagnetic field	G. Benfatto, F. Nicolò
661	Type N gravitational field with twist. II	I. Hauser
668	Birkhoff’s theorem and magnetic monopole solutions for a system of generalized Einstein–Maxwell field equations	Gregory Walter Horndeski
675	Rigorous results on ferromagnetic lattice spin systems. I	Yukihiko Karaki
683	Nonbijective canonical transformations and their representation in quantum mechanics	P. Kramer, M. Moshinsky, T.H. Seligman
694	New variational bounds on generalized polarizabilities	Peter D. Robinson

Subscription Prices (1978)	Optional air freight		Reprints of individual articles in this journal may be ordered singly at \$0.50 per page (orders filled in 24 hours) from the American Institute of Physics, <i>Current Physics Reprints</i> , 335 East 45th Street, New York, N.Y. 10017.	
	U.S.A., Canada, Mexico	Foreign (surface mail)	Europe, Mideast, N. Africa	Asia and Oceania
Members (affiliated and member societies).	\$18.00	\$22.00	\$30.00	\$40.00
All others	\$95.00	\$99.00	\$107.00	\$117.00

Back-Number Prices. Single copies: \$10.00.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to: Subscription Fulfillment Division, American Institute of Physics, 335 East 45th Street, New York, N.Y. 10017. Allow at least six weeks advance notice. For address changes please send both old and new addresses, and, if possible, include an address-stencil imprint from the mailing wrapper of a recent issue. For your convenience a **change of address form is included in every issue of *Physics Today*; please use it.** Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue’s actual date of publication; otherwise, the issue may be purchased at the single copy price.

Copying Fees: The code at the bottom of the first page of each article in this journal gives the fee for each copy of the article made beyond the free copying permitted under the 1978 US Copyright Law. (See also the statement under “Copyright” on the inside front cover of this journal). This fee can be paid to the American Institute of Physics through the *Copyright Clearance Center, Inc., Box 765, Schenectady, N.Y. 12301*. For articles published before 1978 the copying fee is \$0.25 per article.

Microfilm editions of back volumes of *Journal of Mathematical Physics* are available on 16 mm and 35 mm. Volumes 1–16 (1960–1975) are available for \$549.00. The price for the complete year 1976, Vol. 17, is \$85.00. Special discounts for the complete backfile of journals published by AIP are also available. *Journal of Mathematical Physics* also appears on a monthly basis in *Current Price Microform* (CPM) Section I (domestic lease, \$2100 per year; foreign lease, slightly higher) along with 20 other journals published by the American Institute of Physics and its member societies. *Journal of Mathematical Physics* is indexed in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP or its member societies.
