AIP EDITORIAL AND COMPOSITION STAFF: Margaret Rose Pavin, *Editorial Supervisor*; Barbara Tompkins, *Assistant Supervisor*; Robert Kaplan, *Senior Copy Editor*

Léon Benedict, *Composition Manager*; Adele Ruemer, *Chief Mechanical Artist*; Wallace Ross, *Senior Repro Typist*; Bruce Williams, *Proofreader*

Applied Physics Letters is published semimonthly by the American Institute of Physics with the cooperation of the American Physical Society and the Optical Society of America. Its purpose is to provide rapid dissemination of new developments in fields regularly covered by the *Journal of Applied Physics*.

Information for Contributors

Submit manuscripts to Gilbert J. Perlow, Editor, *Applied Physics Letters*, Argonne National Laboratory, P.O. Box 296, Argonne, Ill. 60439. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whichever holds the copyright) to AIP; a form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new (1978) U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a *page charge* of \$95 per page (with a one-page minimum) and an *article charge* of \$20 per article. The page charge (if honored) entitles the author to 100 free reprints. For Errata the minimum page charge is \$10, with no article charge and no free reprints. Non-payment of the publication charge may lead to delays in publication.

Timeliness and current importance of the subject matter, and brevity and clarity of the presentation determine the acceptability of contributions. Feasibility studies and mere proposals for future research seldom meet the criteria for acceptability. Contributions lacking the element of urgency may be acceptable as Communications in the *Journal of Applied Physics*. Each Letter should be reasonably self-contained, and may on occasion be followed by a comprehensive report in the *Journal of Applied Physics* or elsewhere. Results of an extended research program should not be presented as a series of Letters in place of a comprehensive article.

Manuscripts should normally be planned to occupy two journal pages or less, and must include an abstract limited to about 100 words. In addition to the title, abstract and references, two pages permit about 1800 words of text, reduced however by allowances for equations, tables, and figures. An average one-column figure with its caption will displace about 220 words of

text. In some cases a longer manuscript may be justified, but a Letter may never exceed three journal pages. Authors are cautioned that discovery of excess length might not occur until a late stage in publication and would then result in delay and expense. Circumvention of the length limitation by division of a long article into smaller parts is considered to be contrary to the purposes of this journal.

Instructions for preparation of manuscripts will be found in the 1 January and 1 July issues of this journal and occasionally in later issues. In brief and incomplete summary: Two copies of the manuscript, including clear copies of the figures, are required, double spaced throughout on one side of 21.6 × 28 cm (8½ × 11 in.) paper. The original should be retained by the author until it is requested, after review. The *abstract*, *references*, *figure captions*, and *tables* are similarly to be double spaced each on its separate sheets. The original *figures* should be original line drawings or high-contrast glossy prints not larger than 21.6 × 28 cm and should be included with the original submission. *References* should conform to the style used in AIP journals including this one. Unusual mathematical symbols should be clarified with marginal notes.

AIP's **Physics Auxiliary Publication Service (PAPS)** is a low-cost depository for material which is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor.

Proof and all correspondence concerning papers in the process of publication should be addressed to: Editorial Supervisor, *Applied Physics Letters*, American Institute of Physics, 335 East 45th Street, New York, N.Y. 10017. In all correspondence reference should be made to title, author, journal, and scheduled date of issue. A limited number of **alterations in proof** are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1979, American Institute of Physics. Individual readers of this journal, and nonprofit libraries acting for them, are freely permitted to make fair use of the material in it, such as to copy an article for use in teaching or research. (For other kinds of copying see "Copying Fees.") Permission is granted to quote from this journal in scientific works with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires, in addition, the consent of one of the original authors and notification of AIP. Republication or systematic or multiple reproduction of any material in this journal (including abstracts) is permitted only under license from AIP; in addition, AIP may require that permission also be obtained from one of the authors. Address inquiries and notices to Director, Publications Division, AIP.

305	Freedericksz transition and anchoring effects in the oblique configuration of a nematic liquid crystal	T. Motooka, A. Fukuhara, K. Suzuki
307	Electrical properties of semiconductor-electrolyte (CdS-NiCl ₂) using surface acoustic wave techniques	P. Das, R.T. Webster, B. Davari
310	A high-intensity scanning ion probe with submicrometer spot size	R.L. Seliger, J.W. Ward, V. Wang, R.L. Kubena
312	Depth of melting produced by pulsed-laser irradiation	Jagdish Narayan
315	Absorption processes in the XeCl laser	L.F. Champagne, L.J. Palumbo, T.G. Finn
318	Tunable stimulated Raman scattering in the far infrared	C.K.N. Patel, Y. Yafet
321	Efficient hologram recording in LiNbO ₃ :Fe using optical pulses	Che-Tsung Chen, Dae M. Kim, D. von der Linde
324	HgBr and Hgl B-state quenching rate constants	J.G. Eden, R.W. Waynant
327	Intensity dependence of harmonic generation in 10-μm laser-produced plasmas	H.A. Baldis, N.H. Burnett, G.D. Enright, M.C. Richardson
330	Spectral hole burning in GaAs junction lasers	Navin B. Patel, P. Brosson, J.E. Ripper
332	The effect of free-carrier absorption on the annealing of ion-implanted silicon by pulsed lasers	A. Lietoila, J.F. Gibbons
335	Abrupt Ga _{1-x} Al _x As-GaAs quantum-well heterostructures grown by metalorganic chemical vapor deposition	R.D. Dupuis, P.D. Dapkus, C.M. Garner, C.Y. Su, W.E. Spicer
337	Passivation of grain boundaries in polycrystalline silicon	C.H. Seager, D.S. Ginley
340	Transverse magnetoresistance of highly doped n-type InSb in strong magnetic fields	Chhi-Chong Wu, Anna Chen
342	Nonlinear sputtering effects in thin metal films	D.A. Thompson, S.S. Johar
345	Quasiparticle heterodyne mixing in SIS tunnel junctions	P.L. Richards, T.M. Shen, R.E. Harris, F.L. Lloyd
347	Low-noise 115-GHz mixing in superconducting oxide-barrier tunnel junctions	G.J. Dolan, T.G. Phillips, D.P. Woody

Subscription Prices (1979)	U.S.A. & Poss.	Foreign (incl. Can. & Mex.)	Optional air freight	
			Europe, Mideast, N. Africa	Asia and Oceania
Members (affiliated & member societies)	\$13.00	\$19.00	\$28.00	\$41.00
Regular rate	\$55.00	\$61.00	\$70.00	\$83.00

Back-Number Prices. Single copies: \$4.00.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to: Subscription Fulfillment Division, American Institute of Physics, 335 East 45th Street, New York, N.Y. 10017. Allow at least six weeks advance notice. For address changes please send both old and new addresses, and, if possible, include an address-stencil imprint from the mailing wrapper of a recent issue. For your convenience a **change of address form is included in every issue of *Physics Today*; please use it.** Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single copy price.

Reprints of individual articles in this journal may be ordered singly at \$0.50 per article page with a minimum charge of \$2.00 per order. Orders are filled in 24 hours. No postage charge for surface mail if order is prepaid. Send orders to the American Institute of Physics, *Current Physics Reprints*, 335 East 45th Street, New York, N.Y. 10017.

Copying Fees: The code at the bottom of the first page of each article in this journal gives the fee for each copy of the article made beyond the free copying permitted under the 1978 US Copyright Law. (See also the statement under "Copyright" elsewhere in this journal.) This fee can be paid to the American Institute of Physics through the *Copyright Clearance Center, Inc., Box 765, Schenectady, N.Y. 12301.* For articles published before 1978 the copying fee is \$0.25 per article.

Microfilm subscriptions of complete volumes of *Applied Physics Letters* are available on 16 mm and 35 mm. Volumes 1-31 (Sept. 1962-Dec. 1977) are available at a cost of \$380.00. The price for the complete year Jan.-Dec. 1978, Vols. 32 and 33, is \$55.00. *Applied Physics Letters* also appears on a monthly basis in *Current Physics Microform (CPM) Section I* (\$2100 per year) along with 24 other journals published by the American Institute of Physics and its member societies. *Applied Physics Letters* is indexed quarterly in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP or its member societies.
