AIP EDITORIAL AND COMPOSITION STAFF: Steven Kuduk, *Editorial Supervisor*; Yin Ping Ho, *Chief Copy Editor*; John Ripka, *Senior Copy Editor*; Barbara Maki, *Keyboarding Supervisor*; Honey West, *Paste-up Supervisor*; Dianne Longi, *Production Control Supervisor*; Renee Borriello, *Production Assistant*

Applied Physics Letters is published semimonthly by the American Institute of Physics with the cooperation of the American Physical Society and the Optical Society of America. Its purpose is to provide rapid dissemination of new developments in fields regularly covered by the *Journal of Applied Physics*.

Information for Contributors

Submit manuscripts to Gilbert J. Perlow, Editor, *Applied Physics Letters*, Argonne National Laboratory, P. O. Box 296, Argonne, IL 60439. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whichever holds the copyright) to AIP; a suitable form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the 1978 U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a *page charge* of \$100 per page (with a one page minimum) and an *article charge* of \$20 per article. The page charge (if honored) entitles the author to 100 free reprints. For Errata the minimum page charge is \$10, with no article charge and no free reprints. Nonpayment of the publication charge may lead to delay in publication.

Timeliness and current importance of the subject matter, and brevity and clarity of the presentation determine the acceptability of contributions. Feasibility studies and mere proposals for future research seldom meet the criteria for acceptability. Contributions lacking the element of urgency may be acceptable as Communications in the *Journal of Applied Physics*. Each Letter should be reasonably self-contained, and may on occasion be followed by a comprehensive report in the *Journal of Applied Physics* or elsewhere. Results of an extended research program should not be presented as a series of Letters in place of a comprehensive article.

Manuscripts should normally be planned to occupy two journal pages or less, and must include an abstract limited to about 100 words. In addition to the title, abstract and references, two pages permit about 1800 words of text, reduced however by allowances for equations, tables, and figures. An average one-column figure with its caption will displace about 220 words of text. In some cases a longer manuscript may be justified, but a Letter may never exceed three journal pages.

Authors are cautioned that discovery of excess length might not occur until a late stage in publication and would then result in delay and expense. Circumvention of the length limitation by division of a long article into smaller parts is considered to be contrary to the purposes of this journal.

Instructions for preparation of manuscripts will be found in the 1 January and 1 July issues of this journal and occasionally in later issues. In brief and incomplete summary: Two copies of the manuscript, including clear copies of the figures, are required double spaced throughout on one side of 21.6 × 28 cm (8½ × 11 in.) paper. The original should be retained by the author until it is requested, after review. The *abstract*, *references*, *figure captions*, and *tables* are similarly to be double spaced, each on its separate sheets. The original *figures* should be original line drawings or high-contrast glossy prints not larger than 21.6 × 29 cm and should be included with the original submission. *References* should conform to the style used in AIP journals including this one. Unusual mathematical symbols should be clarified with marginal notes.

AIP's Physics Auxiliary Publication Service (PAPS) is a low-cost depository for material which is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor.

Proof and all correspondence concerning papers in the process of publication should be addressed to: Editorial Supervisor, *Applied Physics Letters*, American Institute of Physics, 335 East 45 Street, New York, NY 10017. In all correspondence reference should be made to title, author, journal, and scheduled date of issue. A limited number of alterations in proof are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1984, American Institute of Physics. Individual teachers, students, researchers, and libraries acting for them are permitted to make copies of articles in this journal for their own use in research or teaching, including multiple copies for classroom or library reserve use, provided such copies are not sold. Copying for sale is subject to payment of copying fees. (See "Copying Fees" paragraph elsewhere in this journal.) Permission is granted to quote from this journal with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires in addition the consent of one of the original authors and notification to AIP. Reproduction for advertising or promotional purposes, or republication in any form, is permitted only under license from AIP, which will normally require that the permission of one of the authors also be obtained. Direct inquiries to Office of Rights and Permissions, American Institute of Physics, 335 East 45 Street, New York, NY 10017.

Back-Number Prices. Single copies: \$12.00.

Applied Physics Letters (ISSN: 0003-6951) is published semi-monthly by the American Institute of Physics. Second-class postage rates are paid at Woodbury, NY, and at additional mailing offices.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to *AIP Subscription Fulfillment Division, 335 East 45th St., New York, NY 10017*. Allow at least six weeks advance notice. For address changes please send both old and new addresses and, if possible, include a mailing label from the wrapper of a recent issue. For your convenience a **change of address form is included in every issue of *Physics Today*; please use it**. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price. (AIP Headquarters and Advertising offices are located at 335 East 45th St., New York, NY 10017;

Subscription Fulfillment offices are located at 500 Sunnyside Blvd., Woodbury, NY 11797.)

Reprints of individual articles in this journal may be ordered singly at \$10.00 per article copy (postage included) for articles up to 20 pages. Beyond 20 pages there is a surcharge of \$0.20 per page. Air mail delivery is available. Orders are filled in 24 hours. Send orders to the American Institute of Physics, *Current Physics Reprints*, 335 East 45th St., New York, NY 10017.

Copying Fees: The code that appears on the first page of articles in this journal gives the fee for each copy of the article made beyond the free copying permitted by AIP. (See statement under "Copyright" elsewhere in this journal.) If no code appears, no fee applies. The fee for pre-1978 articles is \$0.25 per copy. With the exception of copying for advertising and promotional purposes, the express permission of AIP is not required provided the fee is paid through the *Copyright Clearance Center, Inc. (CCC), 21 Congress St., Salem, MA 01970*. Contact the CCC for information on how to report copying and remit payment.

Microfilm subscriptions of complete volumes of *Applied Physics Letters* are available on 16 mm and 35 mm. *Applied Physics Letters* also appears on a monthly basis in *Current Physics Microform (CPM) Section 1* along with 25 other journals published by the American Institute of Physics and its member societies. A *Microfilm Catalog* is available on request. *Applied Physics Letters* is indexed quarterly in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP and its member societies.
