

Applied Physics Letters

Gilbert J. Perlow, Editor

Samuel D. Bader, Robert E. Holland, Alexander Langsdorf, Jr., F. Paul Mooring,
Lynn E. Rehn, and P. James Viccaro, Associate Editors
Diane M. Kurtz, Assistant to the Editor

Editorial Board

Term ending 31 December 1989
John S. Blakemore
Karl Hess
George I. Stegeman

Term ending 31 December 1990
Tsuneya Ando
M. R. Beasley
J. M. Cowley
J. M. Poate

Term ending 31 December 1991
J. I. Budnick
Arthur C. Gossard
Peter J. Price

AIP EDITORIAL AND COMPOSITION STAFF: Janis Bennett, *Managing Editor*; Yin Ping Ho, *Chief Copy Editor*; Andrea Zeitler, *Senior Copy Editor*; Dianne Longi, *Production Control Supervisor*; Susan Joy, Margaret Robles, *Keyboarding Supervisors*; Honey West, *Paste-up Supervisor*; Cindy Klingensmith, *Production Assistant*

Applied Physics Letters is published weekly by the American Institute of Physics with the cooperation of the American Physical Society and the Optical Society of America. Its purpose is to provide rapid dissemination of new developments in fields regularly covered by the *Journal of Applied Physics*.

Information for Contributors

Submit manuscripts to Gilbert J. Perlow, Editor, *Applied Physics Letters*, Argonne National Laboratory, P. O. Box 8296, Argonne, IL 60439-8296. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whichever holds the copyright) to AIP; a suitable form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the 1978 U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a *page charge* of \$85 per page (with a one page minimum) and an *article charge* of \$20 per article. The page charge (if honored) entitles the author to 100 free reprints. For Errata the minimum page charge is \$10, with no article charge and no free reprints. Nonpayment of the publication charge may lead to delay in publication.

Timeliness and current importance of the subject matter, and brevity and clarity of the presentation determine the acceptability of contributions. Feasibility studies and mere proposals for future research seldom meet the criteria for acceptability. Contributions lacking the element of urgency may be acceptable as Communications in the *Journal of Applied Physics*. Each Letter should be reasonably self-contained, and may on occasion be followed by a comprehensive report in the *Journal of Applied Physics* or elsewhere. Results of an extended research program should not be presented as a series of Letters in place of a comprehensive article.

Manuscripts may normally be planned to occupy two journal pages, and must never exceed three journal pages. An abstract limited to about 100 words is required. In addition to the title, abstract, and references, the two-page length permits about 1800 words of text, reduced however by allowances for equations, tables, and figures. An average one-column figure with its caption will displace about 220 words of text. Authors are cautioned that discovery of excess length might not occur until a late stage in publication and would then result in delay

and expense. Circumvention of the length limitation by division of a long article into small parts is considered to be contrary to the purposes of this journal.

A section on Comments is available for criticism or additions to Letters already in print. A Response will normally be solicited to a critical Comment. Comments should contain 1000 words or less.

Instructions for preparation of manuscripts will be found in most issues of this journal. In brief and incomplete summary: Two copies of the manuscript, including clear copies of the figures, are required double spaced throughout on one side of 21.6 × 28 cm (8½ × 11 in.) paper. The abstract, references, figure captions, and tables are similarly to be double spaced, each on its separate sheet. The original figures should be line drawings or high-contrast glossy prints not larger than 21.6 × 28 cm and should be included with the submission. References should conform to the style used in AIP journals, including this one. Unusual mathematical symbols should be clarified with marginal notes.

AIP's Physics Auxiliary Publication Service (PAPS) is a low-cost depository for material which is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor.

Proof and all correspondence concerning papers in the process of publication should be addressed to: Managing Editor, *Applied Physics Letters*, American Institute of Physics, 335 East 45 Street, New York, NY 10017-3483. In all correspondence reference should be made to title, author, journal, and scheduled date of issue. A limited number of alterations in proof are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1989, American Institute of Physics. Individual teachers, students, researchers, and libraries acting for them are permitted to make copies of articles in this journal for their own use in research or teaching, including multiple copies for classroom or library reserve use, provided such copies are not sold. Copying for sale is subject to payment of copying fees. (See "Copying Fees" paragraph elsewhere in this journal.) Permission is granted to quote from this journal with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires in addition the consent of one of the original authors and notification to AIP. Reproduction for advertising or promotional purposes, or republication in any form, is permitted only under license from AIP, which will normally require that the permission of one of the authors also be obtained. Direct inquiries to Office of Rights and Permissions, American Institute of Physics, 335 East 45 Street, New York, NY 10017-3483.
