

THE JOURNAL OF CHEMICAL PHYSICS

J.W. Stout, Editor

Jane Holland, *Editorial Assistant*

Associate Editors

Term ending 31 December 1979

W.S. Koski
V. McKoy
Don Secrest
W. Siebrand
William A. Steele
Lennard Wharton

Term ending 31 December 1980

Joseph Berkowitz
David Chandler
R.D. Levine
Terry A. Miller
Robert Silbey
Donald G. Truhlar

Term ending 31 December 1981

W.C. Lineberger
C.A. McDowell
John Overend
Philip Pechukas
Henry F. Schaefer III
D.W. Setser

Jo-Ann Wasserman, *Managing Editor*; Jacqueline Cannon, *Chief Copy Editor*; Michael Fay, *Assistant Chief Copy Editor*;
Sudha Prasad, *Senior Copy Editor*.

The Journal of Chemical Physics is published semi-monthly by the American Institute of Physics. Its purpose is to bridge a gap between journals of physics and journals of chemistry. The artificial boundary between physics and chemistry has now been in actual fact completely eliminated, and a large and active group is engaged in research which is as much the one as the other. It is to this group that the Journal is rendering its principal service and makes its greatest appeal, both as a prompt and efficient medium for publication of research and as a convenient and carefully edited assemblage of pertinent information.

Information for Contributors

Submit manuscripts to J.W. Stout, Editor, *The Journal of Chemical Physics*, Department of Chemistry, The University of Chicago, Chicago, Ill. 60637. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whichever holds the copyright) to AIP; a form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new (1978) U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a page charge of \$70 per page (with a one-page minimum) and an article charge of \$20 per article. The page charge (if honored) entitles the author to 100 free reprints. For Errata the minimum page charge is \$10, with no article charge and no free reprints. Non-payment of the publication charge may lead to delays in publication.

All mathematical expressions and formulas, insofar as possible, should be typed, with unavailable Greek letters or symbols inserted neatly in ink. Distinguish between capital and small letters. Avoid complicated superscripts and subscripts. Avoid repetition of a complicated expression by representing it as a symbol. Identify in the margin handwritten Greek letters and unusual symbols. Use fractional exponents instead of root signs.

References should appear as consecutively numbered footnotes. Literature citations of technical journals should be in the form indicated in the *Style Manual* of the American Institute of

Physics (price \$7.50 prepaid from American Institute of Physics, Dept. BN, 335 East 45th Street, New York, N.Y. 10017).

Tables may be typewritten on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text. Avoid complicated column headings.

Figures should, whenever practicable, be planned for reproduction in one-column width (8 cm). Line drawings should be India ink on white paper or high-quality tracing cloth. The original drawing or a high-quality glossy print should be submitted. To facilitate mailing and handling, original drawings should not exceed 22 by 28 cm in size. Lettering, preferably drawn with a mechanical set, should be of a size so that when reduced the smallest lower-case letters will not be less than about 1.5 mm. Avoid gross disparities in lettering size on a drawing. Consult the *Style Manual* of the American Institute of Physics for further discussion of figures. Type figure captions on a separate sheet of paper. Number figures consecutively. Identify each original drawing or photograph with the figure number and authors' names, written where they will not be reproduced.

AIP's **Physics Auxiliary Publication Service (PAPS)** is a low-cost depository for material which is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor.

Proof and all correspondence concerning papers in the process of publication should be addressed to: Editorial Supervisor, *The Journal of Chemical Physics*, American Institute of Physics, 335 East 45th Street, New York, N.Y. 10017. In all correspondence, reference should be made to title, author, journal, and scheduled date of issue. A limited number of **alterations in proof** are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1979, American Institute of Physics. Individual readers of this journal, and nonprofit libraries acting for them, are freely permitted to make fair use of the material in it, such as to copy an article for use in teaching or research. (For other kinds of copying see "Copying Fees.") Permission is granted to quote from this journal in scientific works with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires, in addition, the consent of one of the original authors and notification of AIP. Republication or systematic or multiple reproduction of any material in this journal (including abstracts) is permitted only under license from AIP; in addition, AIP may require that permission also be obtained from one of the authors. Address inquiries and notices to Director, Publications Division, AIP.

Analytic potential functions for weakly bound molecules: The <i>X</i> and <i>A</i> states of NaAr and the <i>A</i> state of NaNe	James H. Goble and John S. Winn	2051
Estimation of the dissociation energy of weakly bound molecules from spectroscopic data.	James H. Goble and John S. Winn	2058
ν_3 mode absorption behavior of CO ₂ laser excited SF ₆	T. F. Deutsch and S. R. J. Brueck	2063
A high-pressure conductivity and laser Raman spectroscopic study of aqueous orthophosphate solutions at 25°C	W. A. Adams, Caroline M. Preston, and H. A. M. Chew	2074
A study of $3d \rightarrow 4s$ transitions by modulation spectroscopy	Robert A. Shatwell and Donald S. McClure	2081
Evidence for a very slow transformation in ice VI at low temperatures	G. P. Johari and E. Whalley	2094
Longitudinal nuclear relaxation of an ABX spin system application to a ¹³ C- ¹³ C- ¹ H fragment with and without proton irradiation	D. Canet, H. Nery, and J. Brondeau	2098
Threshold photoelectron spectra of atmospheric molecules. I. Description of method and application to H ₂ , D ₂ , and N ₂	Roger Stockbauer	2108
Power law scaling for rotational energy transfer	David E. Pritchard, Neil Smith, Richard D. Driver, and Timothy A. Brunner	2115
The solvent effect on di- <i>tert</i> -butyl nitroxide. A dipole-dipole model for polar solutes in polar solvents	Allan H. Reddoch and Shiro Konishi	2121
ESR and ENDOR study of x-irradiated single crystals of β -alanine at room temperature.	David M. Close, George W. Fouse, William A. Bernhard, and Roy S. Andersen	2131
Photoionization of ethylene clusters	S. T. Ceyer, P. W. Tiedemann, C. Y. Ng, B. H. Mahan, and Y. T. Lee	2138
A study of the thermal polymerization of styrene by depolarized Rayleigh light scattering spectroscopy	G. R. Alms, G. D. Patterson, and J. R. Stevens	2145
Forbidden Raman scattering processes. I. General considerations and E1-M1 scattering	R. C. Harney	2155

Subscription Prices (1979)	U.S.A. & Poss.	Foreign (incl. Can. & Mex.)	Optional air freight Europe, Asia and Mideast, Oceania N. Africa
Members (affiliated and member societies)	\$ 42.00	\$ 57.00	\$ 97.00 \$141.00
All others	\$195.00	\$210.00	\$250.00 \$294.00

Back-number prices. Single copies: \$10.00

Subscriptions, renewals, address changes, and single-copy orders should be addressed to: Subscription Fulfillment Division, American Institute of Physics, 335 East 45th Street, New York, N.Y. 10017. Allow at least six weeks advance notice. For address changes please send both old and new addresses, and, if possible, include an address-stencil imprint from the mailing wrapper of a recent issue. For your convenience a **change of address form is included in every issue of *Physics Today*; please use it.** Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single copy price.

Reprints of individual articles in this journal may be ordered singly at \$0.50 per article page with a minimum charge of \$2.00 per order. Orders are filled in 24 hours. No postage charge for sur-

face mail if order is prepaid. Send orders to the American Institute of Physics, *Current Physics Reprints*, 335 East 45th Street, New York 10017.

Copying Fees: The code at the bottom of the first page of each article in this journal gives the fee for each copy of the article made beyond the free copying permitted under the 1978 US Copyright Law. (See also the statement under "Copyright" on the inside front cover of this journal.) This fee can be paid to the American Institute of Physics through the *Copyright Clearance Center, Inc.*, Box 765, Schenectady, N.Y. 12301. For articles published before 1978 the copying fee is \$0.25 per article.

Microfilm editions of back volumes of *The Journal of Chemical Physics* are available on 16 and 35mm; Vols. 1-31 (1933-59) \$508; Vols. 32-51 (1960-69) \$1038; Vols. 52, 53 (1970) \$142; Vols. 54, 55 (1971) \$145; Vols. 56, 57 (1972) \$151; Vols. 58, 59 (1973) \$159; Vols. 60, 61 (1974) \$150; Vols. 62, 63 (1975) \$165; Vols. 64, 65 (1976) \$180; Vols. 66, 67 (1977) \$180. Special discounts for the complete backfile of journals published by AIP are also available. *The Journal of Chemical Physics* also appears on a monthly basis in *Current Physics Microform* (CPM) Section I (domestic lease, \$2100 per year; foreign lease slightly higher) along with 20 other journals published by the American Institute of Physics and its member societies. *The Journal of Chemical Physics* is indexed quarterly in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP or its member societies.
