

THE JOURNAL OF CHEMICAL PHYSICS

John Light, Editor Donald Levy, Associate Editor
J. W. Stout, Consulting Editor

Editorial Board

<i>Term ending 31 December 1991</i>	<i>Term ending 31 December 1992</i>	<i>Term ending 31 December 1993</i>
N. C. Handy	F. Fleming Crim	S. T. Ceyer
Paul L. Houston	Richard N. Dixon	Patricia M. Dehmer
Marilyn E. Jacox	S. F. Edwards	David W. Oxtoby
Robert Pećora	Douglas Henderson	Matthew Tirrell
Mark Ratner	George C. Schatz	J. K. G. Watson
Gerald J. Small	Rodney J. Bartlett	Curt Wittig

Rosalind Nissim, *Editorial Supervisor*; Lin Miller, *Journal Coordinator*; Todd Reiss, *Chief Production Editor*;

Carolyn DeMarco, Marilyn Schrage, *Senior Production Editors*

The Journal of Chemical Physics is published semimonthly by the American Institute of Physics (AIP). Its purpose is to bridge a gap between journals of physics and journals of chemistry. The artificial boundary between physics and chemistry has now been in actual fact completely eliminated, and a large and active group is engaged in research which is as much the one as the other. It is to this group that the Journal is rendering its principal service and makes its greatest appeal, both as a prompt and efficient medium for publication of research and as a convenient and carefully edited assemblage of pertinent information.

Information for Contributors

Submit manuscripts in duplicate to John Light, Editor, *Journal of Chemical Physics*, Department of Chemistry, 5735 S. Ellis Avenue, The University of Chicago, Chicago, IL 60637. Submission is a representation that the manuscript has not been published previously nor currently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers— whoever holds the copyright) to AIP; a suitable form for copyright transfer is occasionally printed in the back of this journal and is available from the Editor's office or AIP. This written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the 1978 U.S. copyright law in order for AIP to continue disseminating physics research results as widely as possible. Further information may be obtained from AIP. Authors may suggest a running title of approximately 40 characters and the desired section (see Table of Contents) for their articles.

Publication Charge: To support the cost of wide dissemination of research results through publication of journal pages and production of a data base of articles, the author's institution is requested to pay a *page charge* of \$55 per page (with a one-page minimum) and an *article charge* of \$20 per article. For **Errata** the minimum page charge is \$10, with no article charge.

Reprints: Reprints may be ordered at current rates from AIP Publication Billing Division, 500 Sunnyside Boulevard, Woodbury, New York 11797-2999; minimum order of 100 is required.

All mathematical expressions and formulas, insofar as possible, should be typed, with unavailable Greek letters or symbols inserted neatly in ink. Distinguish between capital and small letters. Avoid complicated superscripts and subscripts. Avoid repetition of a complicated expression by representing it as a symbol. Identify in the margin handwritten Greek letters and unusual symbols. Use fractional exponents instead of root signs.

References should appear as consecutively numbered footnotes. Literature citations of technical journals should be in the form indicated in the *AIP Style Manual* available from American Institute of Physics, c/o AIDC, 64 Depot Road, Colchester, VT 05446, for \$10.00 plus shipping charge (in U.S. and Canada,

\$2.75; overseas \$7.50) prepaid. To order via credit card, call toll free: 800-445-6639.

Tables may be typewritten on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text. Avoid complicated column headings.

Figures should, whenever practicable, be planned for reproduction in one-column-width (8 cm). Line drawings should be in India ink on white paper or high-quality tracing cloth. The original drawing or a high-quality glossy print should be submitted. To facilitate mailing and handling, original drawings should not exceed 22 by 28 cm in size. Lettering, preferably drawn with a mechanical set, should be of a size so that when reduced the smallest lower-case letters will not be less than about 1.5 mm. Avoid gross disparities in lettering size on a drawing. Consult the *AIP Style Manual* for further discussion of figures. Type figure captions on a separate sheet of paper. Number figures consecutively. Identify each original drawing or photograph with the figure number and authors' names, written where they will not be reproduced.

AIP's **Physics Auxiliary Publication Service (PAPS)** is a low-cost depository for material that is part of and supplementary to a published paper, but is too long to be included in the journal; inquire of the Editor. Authors are encouraged to submit to PAPS extensive compilations of data and results which may be important only to a few workers in the field.

Proofs and all correspondence concerning papers in the process of publication should be addressed to: Managing Editor, *The Journal of Chemical Physics*, American Institute of Physics, 335 East 45th Street, New York, NY 10017. In all correspondence, reference should be made to title, author, journal, and scheduled date of issue. A limited number of **alterations in proof** are unavoidable, but the cost of making extensive alterations after the article has been set in type will be charged to the author.

Copyright 1991, American Institute of Physics. Individual teachers, students, researchers, and libraries acting for them are permitted to make copies of articles in this journal for their own use in research or teaching, including multiple copies for classroom or library reserve use, provided such copies are not sold. Copying for sale is subject to payment of copying fees. (See "Copying Fees" paragraph elsewhere in this journal.) Permission is granted to quote from this journal with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires in addition the consent of one of the original authors and notification to AIP. Reproduction for advertising or promotional purposes, or republication in any form, is permitted only under license from AIP, which will normally require that the permission of one of the authors also be obtained. Direct inquiries to Office of Rights and Permissions, American Institute of Physics, 335 East 45th Street, New York, NY 10017.

Spectroscopy and Light Scattering

Photoionization spectroscopy of nickel clusters: The effect of ammonia adsorption on ionization potentials	
Mark B. Knickelbein and Warren J. C. Menezes	4111
The overtone dynamics of acetylene above 10 000 cm⁻¹	
Brian C. Smith and John S. Winn	4120
Superradiance quenching by confined acoustic phonons in chemically prepared CdS microcrystallites	
Kazuhiko Misawa, Hiroshi Yao, Toyoharu Hayashi, and Takayoshi Kobayashi	4131
Third harmonic generation of extreme ultraviolet radiation in a nitrogen continuous free jet zone of silence	
O. Faucher, F. Aguilon, and R. Campargue	4141
Rovibrational spectra of open-shell van der Waals complexes: Ar-OH(<i>X</i>²<i>I</i>)	
C. Chakravarty and D. C. Clary	4149
Conjugation length dependence of Raman scattering in a series of linear polyenes: Implications for polyacetylene	
H. E. Schaffer, R. R. Chance, R. J. Silbey, K. Knoll, and R. R. Schrock	4161
Nonadiabatic electronic interactions in the ion-pair states of NeICI	
Thomas A. Stephenson, Yujian Hong, and Marsha I. Lester	4171
Molecular Interactions and Reactions, Scattering, Photochemistry	
Photodissociation of acetone at 193 nm: Rotational- and vibrational-state distributions of methyl fragments by diode laser absorption/gain spectroscopy	
G. E. Hall, D. Vanden Bout, and Trevor J. Sears	4182
Lifetime measurement of a collision complex using ion cyclotron double resonance. H₂C₆N₂⁺	
Vincent G. Anichich, Atish D. Sen, Wesley T. Huntress, Jr., and Murray J. McEwan	4189
Theoretical stabilization and scattering studies of resonances in the addition reaction H + CO ⇌ HCO	
Bela Gazdy, Joel M. Bowman, Seon-Woog Cho, and Albert F. Wagner	4192
Photodissociation of ammonia at 193.3 nm: Rovibrational state distribution of the NH₂(\tilde{A}^2A_1) fragment	
Eric L. Woodbridge, Michael N. R. Ashfold, and Stephen R. Leone	4195

Subscription Prices* (1991)

	U.S.A. & Poss.	Can., Mex., Central & S. Amer. & Caribbean	Foreign Surface Mail	Optional	
				Air Freight Europe, Asia, Africa & Oceania	Air Freight
Members [†]	\$150.00	\$225.00	\$320.00	_____	\$320.00
Reg. rate	\$1600.00	\$1675.00	_____	\$1770.00 [‡]	_____

* The journal is available on microfiche at \$150 per year to members and \$1600 per year at the regular rate.

[†] AIP Member and Affiliated Societies.

[‡] Regular rate subscriptions to Europe, Asia, Africa, and Oceania include air freight service.

Back number prices: Single copies: \$70.00.

The *Journal of Chemical Physics* (ISSN: 0021-9606) is published semimonthly by the American Institute of Physics. Second-class postage rates paid at Woodbury, NY and at additional mailing offices. POSTMASTER: Send address changes to *Journal of Chemical Physics*, 500 Sunnyside Blvd., Woodbury, NY 11797.

Subscriptions, renewals, and address changes should be addressed to *AIP Member and Subscriber Services Division*, 500 Sunnyside Blvd., Woodbury, NY 11797. Allow at least six weeks advance notice. For address changes please send both old and new addresses and, if possible, include a mailing label from the wrapper of a recent issue. For your convenience a **change-of-address form is included in every issue of *Physics Today*; please use it.** AIP will honor a request for a missing journal issue only within six months of that is-

sue's actual date of publication. Requests received for missing issues beyond six months of the actual publication date will not be honored. The issue may, however, be purchased at the single-copy price. (AIP Headquarters are located at 335 East 45th St., New York, NY 10017).

Single-copy orders (current and back issues) should be addressed to *Publication Billing*, 500 Sunnyside Blvd., Woodbury, NY 11797.

Reprints of individual articles in this journal may be ordered at \$10.00 per article copy (postage included). Air mail delivery available. Send orders to the American Institute of Physics, *Publication Billing*, 500 Sunnyside Blvd., Woodbury, NY 11797.

Copying Fees: The code that appears on the first page of articles in this journal gives the fee for each copy of the article made beyond the free copying permitted by AIP. (See statement under "Copyright" elsewhere in this journal.) If no code appears, no fee applies. The fee for pre-1978 articles is \$0.25 per copy. With the exception of copying for advertising and promotional purposes, the express permission of AIP is not required provided the fee is paid through the *Copyright Clearance Center, Inc. (CCC)*, 21 Congress Street, Salem, MA 01970. Contact the CCC for information on how to report copying and remit payment.

Microfilm editions of back volumes of *The Journal of Chemical Physics* are available on 16 mm and 35 mm. Special discounts for the complete backfile of journals published by AIP are also available. *The Journal of Chemical Physics* appears on a monthly basis in *Current Physics Microform (CPM)* along with 32 other journals published by the American Institute of Physics and its member societies. A *Microfilm Catalog* is available on request. *The Journal of Chemical Physics* is indexed quarterly in *Current Physics Index*, a subject and author index (with abstracts) to all journals published by AIP and its member societies.
