The Henri Poincaré Prize Laureates

The Henri Poincaré Prize—awarded every three years by the International Association of Mathematical Physics (IAMP) and sponsored by the Daniel Jagołnitzer Foundation—was created in 1997 to recognize outstanding contributions in mathematical physics, and contributions which lay the groundwork for novel developments in this broad field. The Prize was also created by the IAMP to recognize and support young people of exceptional promise who have already made outstanding contributions to the field of mathematical physics.

Photographs of the laureates are featured on the front cover of this Special Issue of *Journal of Mathematical Physics*. Grateful acknowledgment is given to those who granted permission to reprint the photographs. Below are listed the person pictured and the source for each photograph:

Top row (from left to right):

Maxim Kontsevich

Photograph by J. F. Dars; reprinted with permission.

Rudolph Haag

Reprinted with permission from the University of Hamburg.

Arthur S. Wightman

Photograph by Raymond Streater; reprinted with permission.

Walter Thirring

Reprinted with permission from the Austrian Central Library for Physics.

Joel L. Lebowitz

Photograph by Carl Blesch, Rutgers University; reprinted with permission

Hong-Tzer Yau

Reprinted with permission from Dr. Yau.

Middle row (from left to right):

Huzihiro Araki

Photograph by Kozo Masuda; reprinted with permission.

Elliott H. Lieb

Photography by Thomas Ekholm; reprinted with permission.

Oded Schramm

Reprinted with permission of the Schramm family.

Ludwig D. Faddeev

Photograph by Anna Faddeev; reprinted with permission.

David Ruelle

Photograph by Vojkan Jaksic; reprinted with permission.

Edward Witten

Photograph by Randall Hagadorn; reprinted with permission.

Bottom row (from left to right):

Jürg M. Fröhlich

Reprinted with permission . ©ETHZ/D-PHYS/Hostettler.

Robert Seiringer

Reprinted with permission from Dr. Seiringer.

Cédric Villani

Reprinted with permission from the International Congress on Mathematical Physics.

Yakov G. Sinai

Photograph by Dona Vukson; reprinted with permission.
