College Park, MD 20740-3846 (301) 209-3350

The American Association of Physicists in Medicine was founded in 1958. Its purposes are to promote the application of physics to medicine and biology, encourage interest and training in medical physics and related fields. The AAPM has established *Medical Physics* as its primary scientific and informational journal. The AAPM is a Member of the American Institute of Physics. AAPM membership information and application forms may be obtained from the Executive Director.

MEDICAL PHYSICS publishes articles broadly concerned with the relationship of physics to human biology and medicine. Physics may be applied to any biological system; its role may be theoretical, experimental, or clinical. Review articles, research reports, short technical reports, and letters are acceptable.

Submission of a manuscript indicates that it has not been published previously nor concurrently submitted for publication elsewhere. The manuscript should be accompanied by a statement transferring copyright from the authors (or their employers—whoever holds the copyright) to the American Association of Physicists in Medicine; a suitable form for copyright transfer is available from the Editorial Office at College Park.
